

Passport 2008 New Features and Enhancements

Passport Software, Inc. is pleased to share these exciting new features and enhancements coming to Passport Business Solutions during 2008!

Bank Management

These new enhancements will offer the convenience of automated electronic disbursement and banking procedures with a new level of control and security over payments. ACH provides the speed and convenience of processing AP disbursements electronically. With Positive Pay only the AP and Payroll payments previously approved and submitted to the bank will be disbursed.

General Ledger

Users will be able to recreate financials from previous years with access to multiple years of General Journal transactions.

Payroll

Advanced vacation pay and bonuses will be added to Direct Deposit. The employee number field will be expanded to six digits. Processing related to Departments will be enhanced to allow Time Worked to be distributed among several departments. Department-related reports and print runs will be processed more efficiently.

Point of Sale

Users will be able to process Point of Sale credit card transactions with Xcharge. Contract Pricing will be expanded to five levels to utilize the five-level pricing structures available in Inventory control.

Miscellaneous

Timed Sales - Sales that start and end at specific times will be able to be processed.

Void processing - A void will be performed as a transaction, creating an audit trail, the inventory will be returned to stock, and the invoice header will be marked as "Void". Voids will show up as part of the daily register reports.

Hold Transaction - Users will be able to put a transaction on hold, process another transaction, and then return to complete the original.

PDF Document lookup - PDF and email lookup capability for any PBS-based .pdf documents.

- End -
