About Slow Internet Connections.

We often have people ask, "Why is my Internet connection so slow?". Well, it's not your imagination, nor is it necessarily your computer that's at fault. Actual broadband speeds lag behind advertised speeds by as much as 50-80%, according to a September announcement from the Federal Communications Commission (FCC). Advertised speeds can be reached if all conditions are right, but many problems that are beyond your control can slow data transfer speeds considerably. The following factors can influence the speed of your connection: [Read More ...](#)

The value of what you sell is Not based on cost.

For years many retailers have done what is commonly referred to as "Keystone" pricing, where the wholesale cost is simply doubled to that gives a simple reasonable profit margin. Often times, pricing of an item like this might be deemed artificially low, especially for trendy items. I've heard some recent complaints from retailers about sales being down., in some cases their hot selling items are actually priced way too low., on what they are selling, they aren't making any profit.
